Total Access 5000 IP DSLAM / BBDLC

(Instructor-led)

Enrollment Part Number: 1600CSYS5030E

This course is designed for those students that will be responsible for either designing, installing, provisioning or maintaining the Total Access 5000 Broadband Digital Loop Carrier (BBDLC) solution. This course will include interactive lectures as well as lab exercises. Integrated hands-on lab exercises are designed to reinforce the classroom instruction. After completion of the course, the student should be able to turn-up, provision, and maintain the ADTRAN Total Access 5000 system.

To enroll, go to www.adtranuniversity.com.
